I think Steve Simonok had some info on waste that got into the nearby landfills (at least that is what John L) told me.

I can't comment on the local landfills, but I think Montrose used Stringfellow and Casmalia pretty heavily. That could be the landfills to which they refer.

Thanks Kelly,

I read the article, but I hadn't noticed that detail. Good point!

I assume you have seen this article - about halfway through it discusses Montrose ' claim that they stopped ocean dumping, and then turned to disposal in local landfills. Probably why they don't want the landfills sampled.

Kelly

Good Morning Judy,

In case you hadn't seen this, this news story on the PV Shelf popped up in my apple news feed!

How the waters off Catalina became a DDT dumping ground

A new generation of scientists have uncovered barrels containing DDT, a toxic pesticide banned decades ago, dumped into the deep ocean.
